

maveo

connect stick

Open Sesame!

- 01** a whole new generation of connectivity product for Marantec openers
- 02** quick installation - plug & play and no extra external power supply needed
- 03** all smart functions available in the well known maveo app

the facts

01

The maveo connect stick is our new product to provide smart features to our customers. The connect stick in combination with the maveo app offers the best connectivity experience for Marantec drives.

02

The maveo connect stick is designed for garage door applications and compatible with our current drive generation.
We want to offer a user experience adapted to the private user.

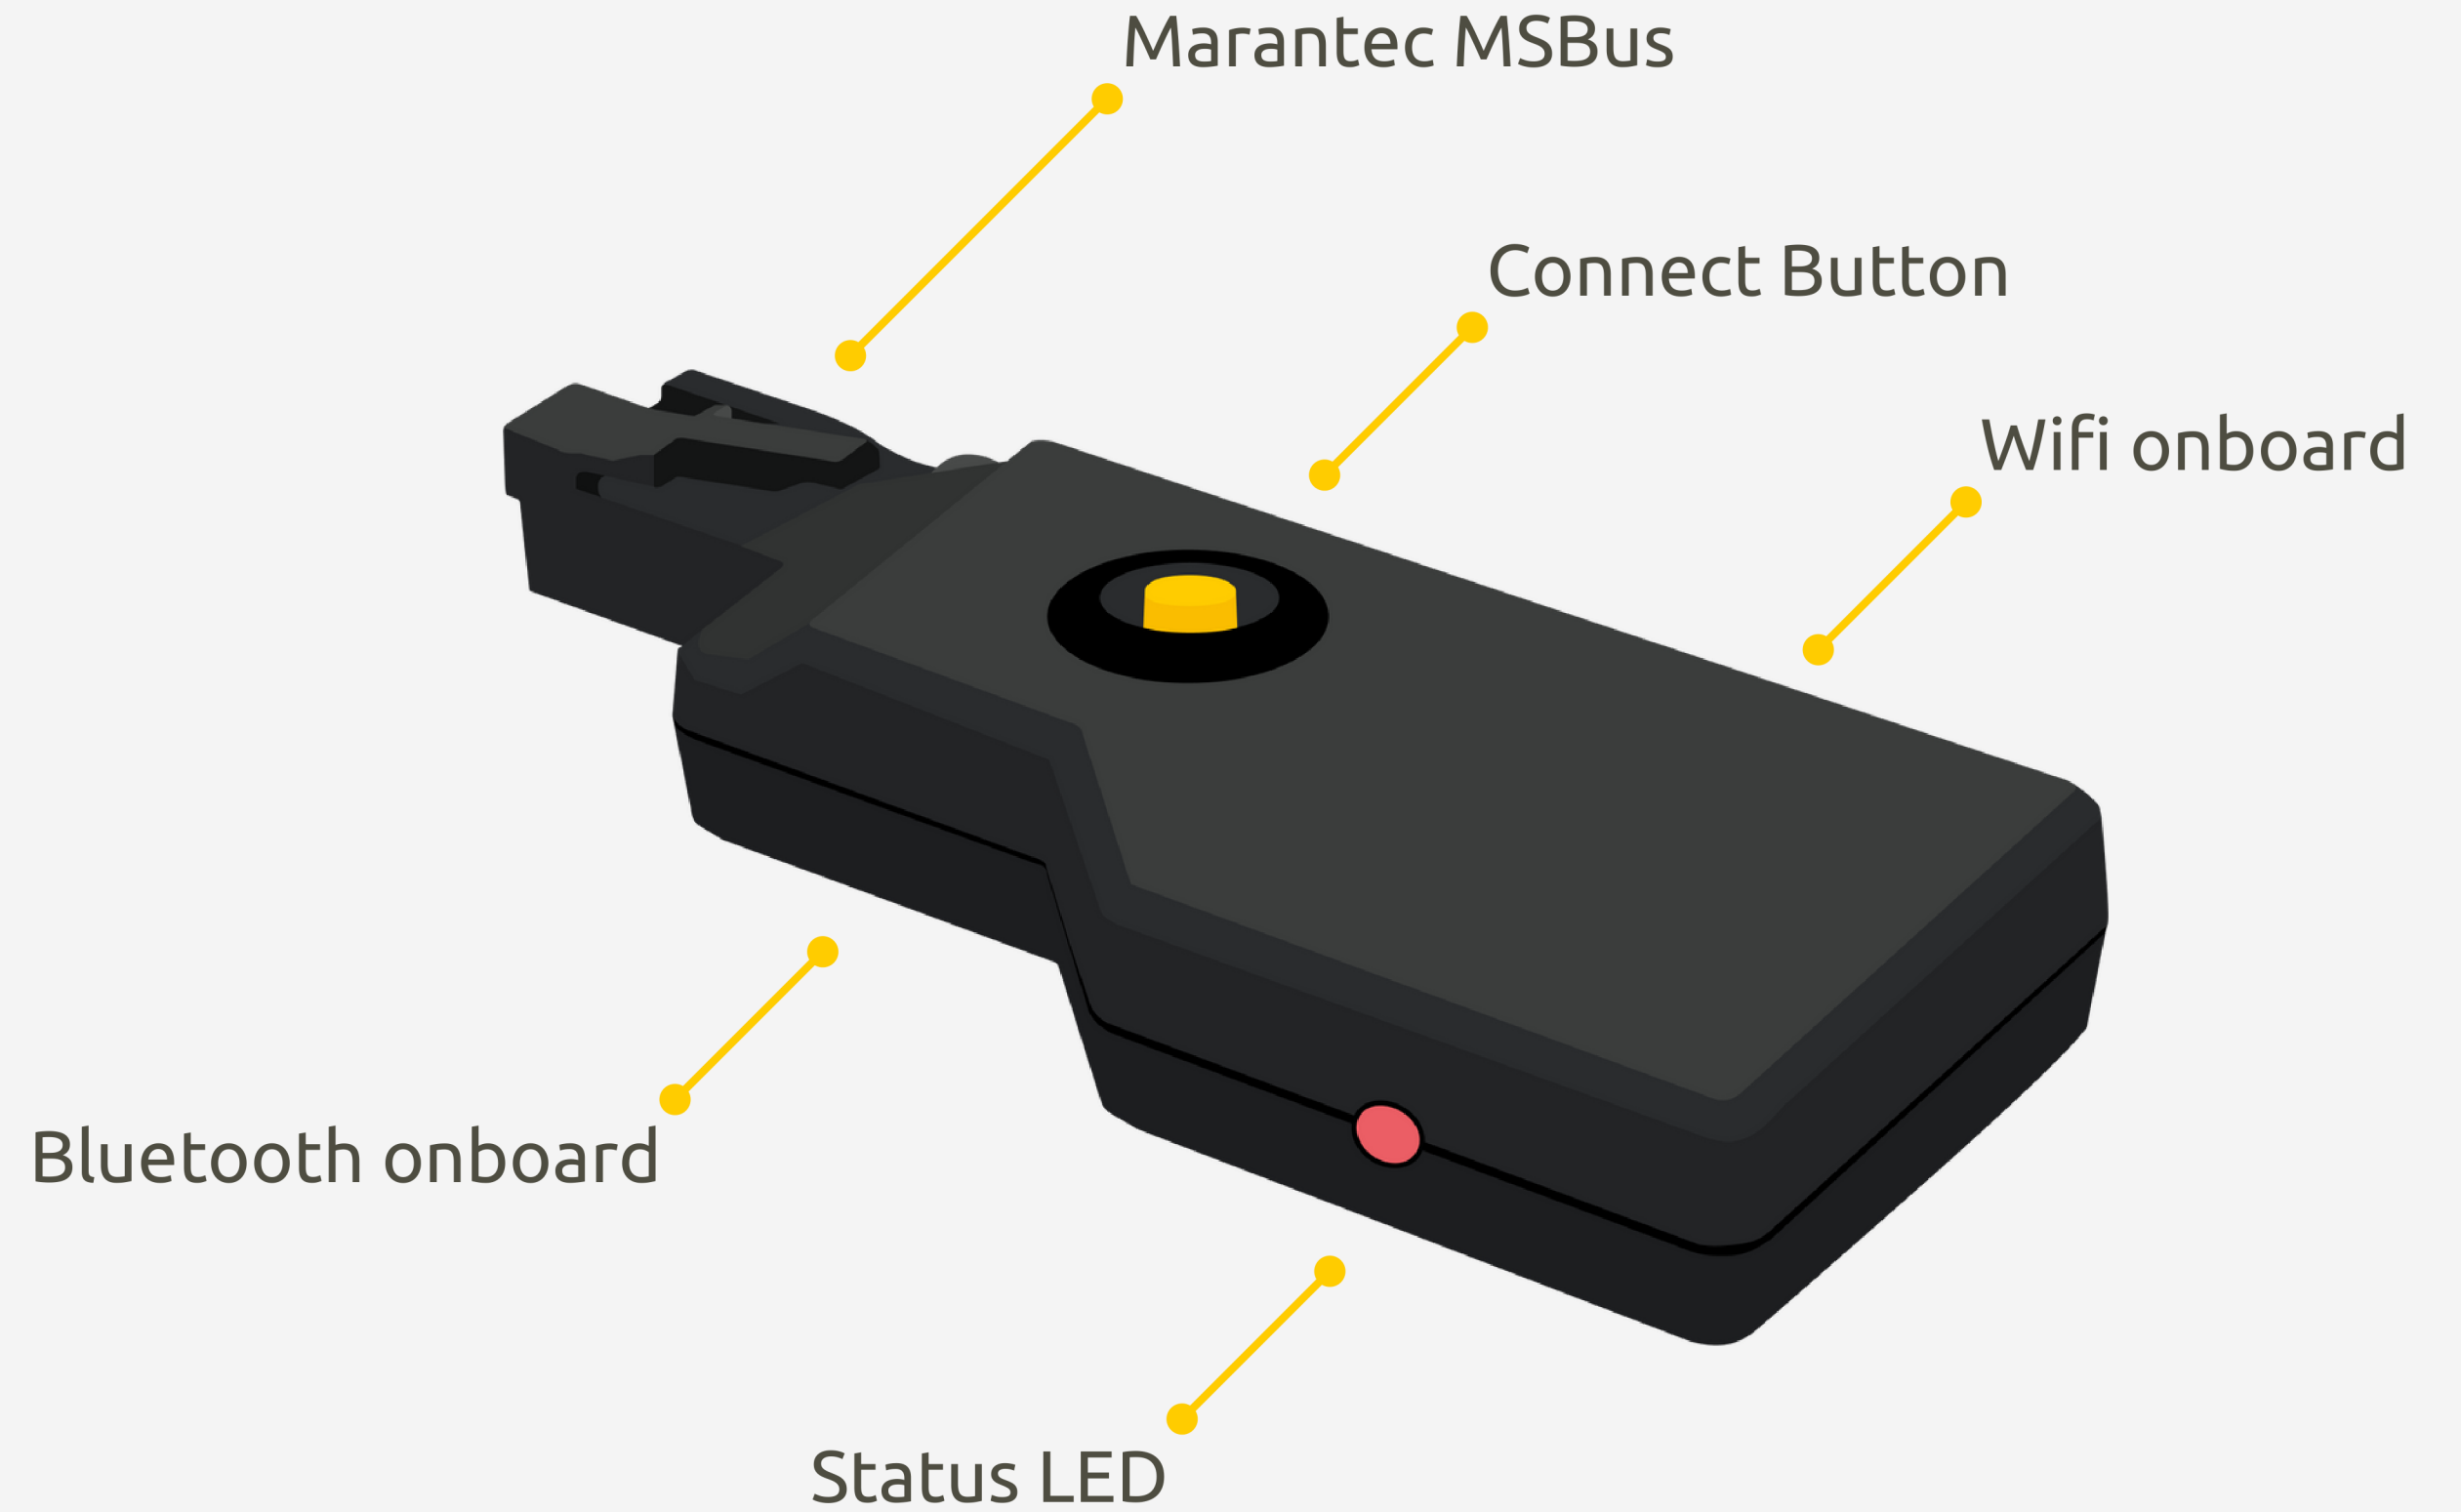

03

The maveo connect stick is intended to replace the maveo box in the area of private applications.
With the box, we want to focus on other applications and thus enable optimally tailored solutions.
